Russian authorities to develop and approve an energy storage development program by March 2027

By 1 March 2027, the Russian government is tasked with developing and approving a comprehensive program for advancement of electrical energy storage systems (EESS) in Russia, covering the period up to 2042. This directive was issued by Russian President Vladimir Putin. The document is expected to outline expanded use of energy storage in the power sector, creation of a legal framework for the participation of such systems in energy markets, and measures to support domestic production.
