Morozov of his position on agenda items of meetings of the Board of Directors of the Company, his ability to accept objective, conscientious and independent of the influence of executive bodies of Rosseti Centre, PJSC and the substantial counterparties of the Company decisions based on the following:

The agreement between the Company and JSC "Motor Vehicle Plant" was concluded to improve the efficiency of the use of motor vehicles, and is designed to provide a prompt response in the event of emergency situations, taking into account the territorial specifics of the Tver region (transport accessibility of power grid facilities, remoteness and scattering of consumers, a limited fleet of vehicles). Moreover, when deciding to agree to the Company's transaction with JSC "Motor Vehicle Plant" as a related party transaction, A.V. Morozov voted against.

- The Company and JSC IEC "Energoefficiency technologies" concluded agreements for provision of services to develop a technical project for creation of computer programs, implementation and maintenance of telecommunications equipment (hereinafter referred to as the Agreements). The choice of JSC IEC "Energoefficiency technologies" as a contractor under the Agreements is due, firstly, to the low cost of performing services/works (compared to the cost of similar services on the market), and secondly, to the presence of a team of highly qualified technical support specialists with competence in accordance with the composition of the systems included in the computer complex and the operational information complex, trained by the manufacturers of equipment and software included in the complex. The Agreements were concluded in order to maintain high-tech IT competencies within the Group of Companies of PJSC Rosseti, reduce the technological dependence of the parent company on the services of foreign vendors and third-party contractors and are designed to improve the security and reliability of the IT infrastructure for the main business process of managing the electric grid complex - dispatching, development and improvement of competencies in the field of maintenance and modernization of modern technological IT systems. Due to the lack of grounds, the Agreements were not subject to approval by the Board of Directors of the Company.

- The Company and Infrastructure investments-3 LLC entered into a lease agreement for movable property. The choice of Infrastructure investments-3 LLC as a contractor under the Agreement is conditioned by Resolution of the Government of the Russian Federation dated 16.06.2014 No. 1059-r, which fixes the main parameters of the project. As part of the project, it is planned to install about 122,000 meters on the territory of the Yaroslavl region in selected sections of the grid. Control over electricity consumption after the installation of the meters will create an effective tool for reducing commercial electricity losses, as well as identifying consumers who do not provide data on the amount of electricity consumption in a timely manner, which will reduce electricity losses. In addition, when deciding on the approval of an amendment to the lease agreement, A.V. Morozov abstained from voting.
