FAS reveals the number of regions that have adopted benchmark-based regulation for power grids

11 Russian regions have fully transitioned to benchmark-based regulation for their power grids. This was announced by Maxim Shashkolsky, head of the Federal Antimonopoly Service (FAS) of Russia, during the All-Russian Tariff Conference. The benchmark-cost method is used to determine the average level of operating expenses required for maintaining power grid infrastructure. It enhances pricing transparency and encourages companies to reduce their costs.
