Yarenergo is upgrading two 10 kV overhead lines in the Pereslavl-Zalesky municipal district

Power engineers are upgrading sections of two 10 kV power lines with a total length of 6.2 km. Their peculiarity is that they pass through a forest area. That is why the project provides for replacement of conventional wire with modern self-supporting insulated wire (SIW). SIW is resistant to ice formation, mechanical damage and wire entanglement during strong wind loads, and also has a higher throughput.
