SO wants to change the calculation of unplanned reduction in generating capacity after a sharp increase in the indicator

In July 2024, when power consumption in the south of the Russian Federation set two historical records, unscheduled shutdowns of power plant equipment led to consumer outages throughout the region. In total, in the European part of the Unified Energy System of Russia (UES), the volume of unavailable capacity in July exceeded 7 GW, System Operator of the Unified Energy System (SO) reported on 23 August. As a result, the regulator decided to initiate amendments to the regulatory framework to improve the calculation of unscheduled reduction in capacity.
